Reasons for Allowance

The following is an Examiner's Statement of Reasons for Allowance:

Claim 1 is allowable over prior art of record.

The examiner has found that the prior art of record does not teach or suggest or render obvious a data processing system, for determining configuration parameter value settings for a computing device to optimize an operational characteristic of the computing device, by performing a geometric transformation on the simplex of points to identify a new point to investigate, wherein if one or more of a configuration parameter values associated with the new point violates one of the upper threshold and lower threshold, the new point is mapped to a point closest to the new point whose associated configuration parameter values satisfy the upper threshold or lower threshold, the point closest to the new point then becoming the new point, checking the converted configuration parameter values to determine if a dimensionality of the simplex is changed by converting of the configuration parameters and responsive to determining that the dimensionality of the simplex is changed, setting the converted configuration parameter values to converted configuration parameter values that equal the converted configuration parameter values minus a penalty value, wherein the penalty value is a quadratic function of a distance between an original configuration parameter value of the new point and the converted configuration parameter value as set forth in the specification and recited in independent claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "*Comments on Statement of Reasons for Allowance*"
